\*Customize your storage by fixing one cabinet onto another.  
! When you exceed the height of 1780 mm, it is recommended to consult with your dealer.

## ADDITIONAL INFORMATION

- Please note that the overall height of the cabinet will increase by 18 mm when placing one cabinet on top of each other (e.g. 1H+1H). This may result in differing overall heights between the cabinets or with desks. Also, note that side panels C0Z007-C0Z025 will not be suitable for cabinet combinations.
- Please note glue on the stickers take time to harden (50% in 15 min, 90% in 24 h and 100% in 72 h). It is advised to wait before first using the cabinet. It is possible to split the cabinets again by carefully removing the top part and cleaning the residual glue with everyday cleaning solvent (e.g. turpentine).

- **Tips for fixing one cabinet onto another:**

- If the combination is higher than 3H, it is recommended to choose a solid base, e.g. metal plinth or plinth, with metal frame (C0Z080 / C0Z081 / C0Z082 - C0Z160 / C0Z161 / C0Z162);
- Compositions exceeding 5H height must be mounted to the wall;
- Additional mounting to the wall and strengthening with wood screws is recommend for cabinets with hinged doors or drawers.

- Please note that shelving units are 400 mm deep, cabinets with hinged doors – 420 mm deep and cabinets with sliding doors are 400 mm deep. Panels C0Z007-C0Z025 are 420 mm deep and will stand out by 20 mm on shelving and sliding door units.

- Fabric back panels of 3H and higher cabinets (C3S160, C4N120, C4S120, C4S121, C4S160, C5S120, C5S121) are made of two pieces.

- Please note that the cushion is suggested for 1H and 2H cabinets and only for short sit up. 1H and 2H cabinets can hold up to 110 kg.

- Please note that when ordering cabinet in two colours (C4N120, C5N120, C6N120), the colour of the connection will also be visible on the backside of the cabinet.

- In the open position, the sliding inner (right) door is visible. There is a gap of 25 mm between the handle and the edge of the left door. Door brakes can be re-assembled (only for cabinet with type "C" handle), if required, and the door will fully open (more information in assembly scheme).

- Central legs (C0Z004, C0Z122, C0Z162, C0Z006) of 1200 mm and 1600 mm width cabinets can be mounted in 2 positions, so there is a possibility to choose the less visible option.

- All bases (plinth, legs, etc.) are slightly recessed from the back of the cabinet due to storage stability and design. Please note that the cabinet cannot be placed against the wall completely if there is a floor plinth.

- When ordering cabinets with pull-out metal filing cradles (C0Z044, C0Z045, C0Z046, C0Z047), it is recommended to order counterweights X0Z020 / X0Z021 / X0Z022 or fix cabinets to the wall / other stable furniture. Please note, that in the set of metal pull-out filing cradles (2 pcs) there is an anti-tilt mechanism, i.e. both cradles cannot be opened at the same time.

- A4 suspension files can only be hanged on lateral filing metal shelves (C0Z038 and C0Z039) in cabinets with hinged doors. The suspension files will not fit on metal shelves (C0Z040, C0Z041, C0Z042, C0Z043) in cabinets with sliding doors.

- Additional shelves can be ordered for the lower part of the wardrobe.

- 6H cabinets always must be fixed to the wall. Wall mount fittings are included with 6H cabinets, additional order is not required. Mounting to the wall is chosen by installer according to the wall type.

- At least one fixed shelf (C0Z034, C0Z0345) or one metal shelf (C0Z038, C0Z039) must be ordered with 4H, 5H and 6H cabinets with doors and without shelves (C4C080, C4C100, C5C080, C5C100, C6C080, C6C100).
